Claims 1-3, 17-19, 21 and 25 are presented for examination.

***Claim Rejections - 35 USC § 112***

Claims 1-3, 17-19, 21 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims are drawn to X is "sugars and "peptides". The instant specification uses the word "sugars" and "peptides". However, there is not an adequate description for what the sugars and peptides encompass. Each of such terms encompasses numerous and countless compounds. Structural identifying characteristics sugars and peptides are not disclosed. Therefore the claimed invention is not supported by an adequate written description. To provide adequate written description an evidence of possession of the claimed genus, the specification must provide sufficient distinguishing identifying characteristics of the genus. The factors to be considered include disclosure of complete or partial structure, physical and /or chemical properties, Functional characteristics, structure/function correlation, or any combination thereof.
